

Seminar 6

Friday, 19 May 2023 16:08

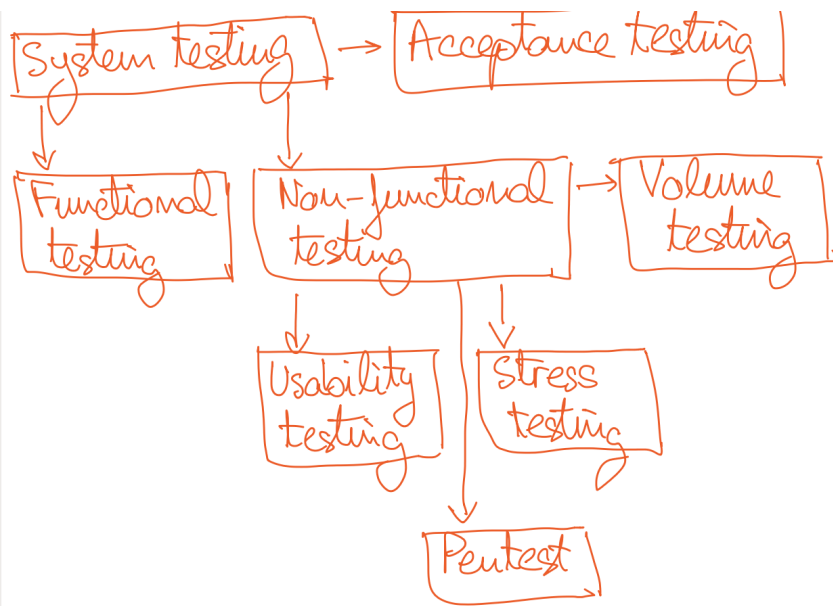

1. Requirements elicitation → system testing
2. Requirements analysis
3. System design → integration/structural testing
4. Object design → unit testing
5. Implementation
6. Testing

↓
Test plan

- unit testing;
- integration testing;

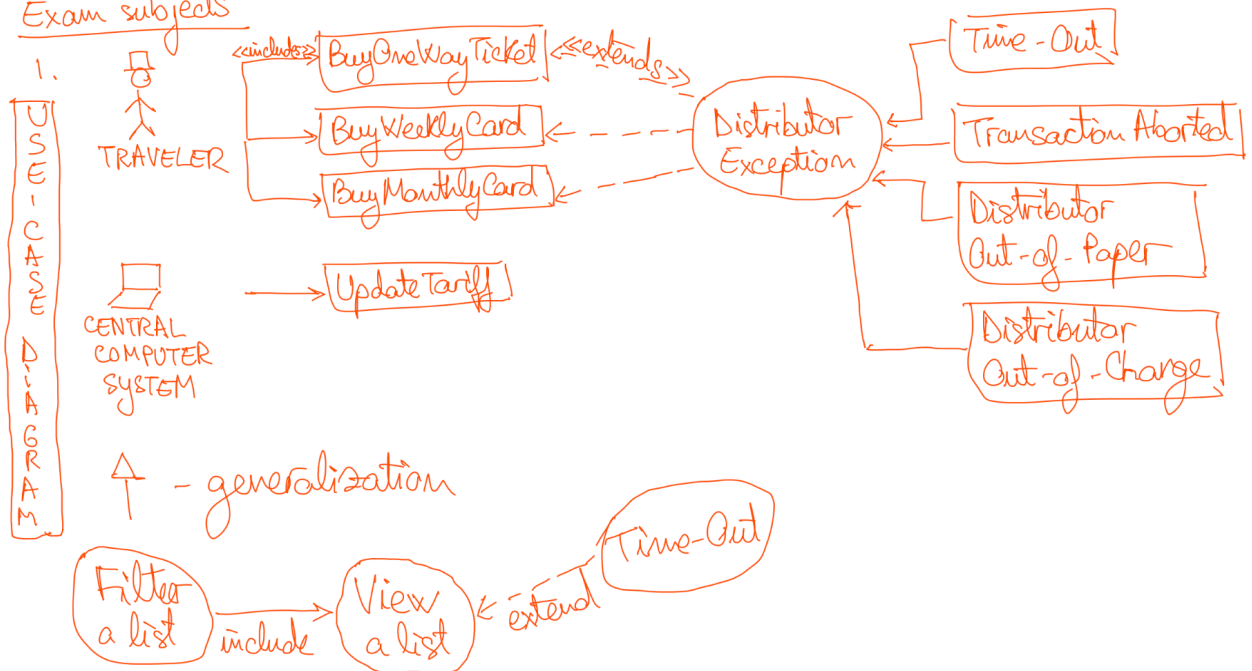

- structural testing;
- system testing;
- regression testing.

⇒ Installation testing

Exam subjects

11. OBJECT ANALYSIS

- Entity objects;
- Boundary objects - link between the actor and the system;
- Control objects.

Entity: File, Folder, Disk

Boundary: Icon, Pointer, TrashCan

Control: -

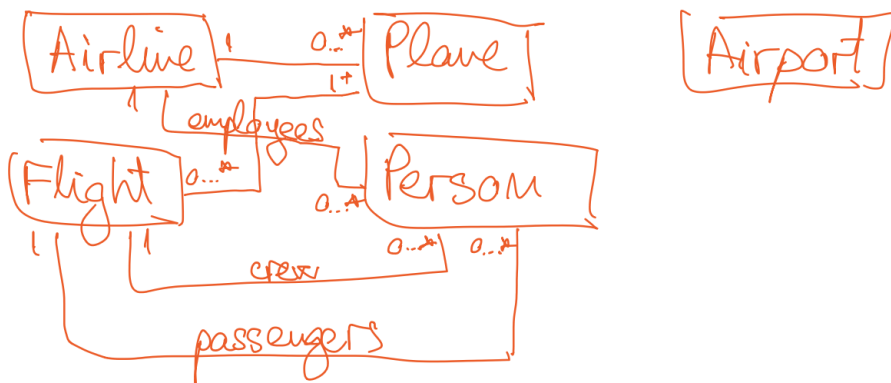

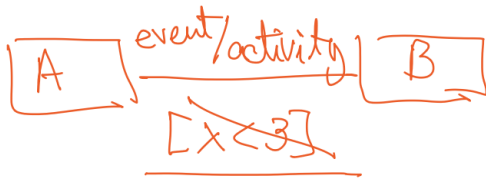

Move File Control

Delete File

III. STATE-MACHINE DIAGRAM

IV. MODELING PROBLEM

$$x = 2$$

V. OCL
